TECHNICAL REQUIREMENTS

MSSQL	Server	Client
<ul style="list-style-type: none"> at least Windows Server 2012 R2 Windows Server 2016 recommended at least 4 x CPU's at least 16 GB RAM at least 100 GB hard disk space installed and already licensed Microsoft MSSQL Server 2012 or newer (up from Express) 	<ul style="list-style-type: none"> at least Windows Server 2012 R2 (current patch level status is mandatory necessary!) Windows Server 2016 recommended at least 2 x CPU's at least 8 GB RAM at least 40 GB hard disk space current .net library (4.6.2 is currently the minimum requirement) Firewall Sharing Windows Management Framework 4.0 (Windows Update KB2819745) must be installed! 	<ul style="list-style-type: none"> Microsoft Windows Version 7 or higher (latest patch level) at least 2 x CPU's at least 2 GB RAM at least 40 GB hard disk space current .net framework (4.6.2 is currently the minimum requirement) If RDP connections are to be established, at least RDP 8.1 must be installed.

*In Essential and Professional Plan, max. 1 application server is allowed, in Enterprise Plan max. 2 application servers are allowed. In the Enterprise Plus Plan any number of application servers can be used (each application server must be purchased separately).

* External tools (Microsoft Load Balancer or other Load Balancers) are required for the functionality.

** External tools are necessary (Microsoft SQL Server).

MATESO

MATESO

MATESO is a leading German IT company which has successfully established in the DACH region since its foundation in 2006. The developed password security solution Password Safe is distributed internationally through its worldwide partner network.

With over 20 years of experience on the market, MATESO maintains the highest standards and continuous innovation of its IT Security Software Made in Germany. Well-known references certify its leadership in Enterprise Password Management - including 20 of the Dax 30 companies.

OUR VALUES

Trust

Companies rely on us for reporting, auditing and monitoring their most sensitive data. We meet this high standard to a high degree. Password Safe combines high quality with legal compliance:

- Password Safe was certified and (SysS) tested in Germany according to highest quality standards.
- The program interfaces and instructions are available in proper German/English.
- The offered products do not contain hidden entrances.

Care

Data security is a sensitive issue. That's why we take care of our customers' data as if it were our own - from start-ups to large corporations.

Simplicity

The subject of IT security is very complex and constantly changing. We offer our customers a

product that solves complex problems easily and that every employee can use quickly with the LightClient without previous knowledge or training.

In addition, we provide technical consulting support and thus also offer a comprehensive service for the successful introduction and long-term use of Password Safe. Thanks to the flexibility of the software, we support our customers in mapping all accesses, accounts and data clearly and structured in Password Safe.

Professionality

We are pioneers in the subject of data protection and inventor of Enterprise Password Management. Our customers benefit from professional on-premise password lifecycle management with the convenience of a cloud solution. With over 20 years of market experience, we offer companies a tried and tested product that is distinguished by our wealth of experience and a high standard of development.
