

# PASSWORD SAFE

## Trouble with passwords?

- ✓ Strong passwords should be complex.
- ✓ Strong passwords should be updated regularly.
- ✓ Strong passwords should only be shared in encrypted form.

### No more „Forgot your password?“ and „Password123“ anymore

Password Safe takes care of password management for all employees - with just one application. So you can move on to other things.

#### **Password Safe, the Password Management Software of MATESO.**

MATESO represents the skillful combination of digital security and innovation - always with the goal of providing password management for companies at the cutting edge. Regardless of countries, company sizes and industries.

**Solve all your password problems with just one application.**

# Manage passwords across the whole corporation

In Password Safe Life Cycle, your passwords and company secrets are protected at all times.

With just one application you can

- generate strong passwords with just one click
- log in without a password
- give employees individual rights depending on their role
- and track all changes at a glance.

## We call this the Password Life Cycle:

Keep the overview of **\*\*\*\*\*jf93!x?4** with the holistic Password Safe application.
