MATESO
PASSWORD SAFE
MSP

Does password management take up too much of your time?

Not anymore. With Password Safe as a Managed Service – now from your certified MSP partner.

Do you lack the resources internally, are there acute security problems or unclearly distributed competencies?

Password Safe Managed Service Provider (MSP) is the tool of choice when it comes to the quick realisation of your professional password management solution - no additional effort, no installation, but as highly secure usual as „IT Security Made in Germany"!

Relieve IT and create resources:

Your MATESO partner takes care of the software management

Security:

Storage of your data in secure data centers

Full cost control:

Transparent costs, monthly adjustments

Usage-based:

Pay only for really active users of the software

Flexibly book additional options to the basic version:

Basic version

Basic functions:
- Secure storage of personal and corporate secrets
- SSO for team passwords
- browser extension and app included
- Multi-factor authentication option

Option*	Description
Task System	Automation of various tasks (e.g. report generation)
Multi-Eye Principle	Approval process for team passwords with multi-eye principle
AD Integration	Synchronization of organizational units, groups and users between Microsoft AD and Password Safe
Offline Access	Extremely protected offline version of Password Safe including export function
Emergency WebViewer	In the event of a system failure, local access to all secrets can be guaranteed.
Temporary Permissions	Access to passwords can be granted for a limited period of time – ideal for apprentices, trainees or interns.

* A usage fee model is currently offered. The mandatory base is the MSP base version. The number of users in the MSP base version also determines the number of users for all options. Additional options are only bookable for all users, not for individual users or groups. The minimum number of users may vary depending on the MSP. For a price overview, contact your sales partner.

Good reasons at a glance

After 20 years on the market, we know our customers' needs. We offer professional password management at its best – now also as a managed service to optimize your processes with high security:

Flexibility for changes at short notice:

The number of your employees changes spontaneously? With the MSP model only the maximum number of active users per month is charged. Changes in the number of users are taken into account in the next monthly statement.

Cost advantage:

Save investment and implementation costs as well as additionally required hardware by using the external competence of your MSP partner!

Flexible user licenses:

You determine the number of users that can be changed monthly and can already start from a few users.

Immediate commissioning:

Accelerated processes from installation to setup and onboarding: Say goodbye to lengthy adjustments to your software and hardware. We ensure that your software is always up to date.

High availability at all locations:

First choice for Distributed Enterprises: Password Safe MSP is where you are. Thanks to MSP, high availability is always guaranteed - regardless of your location!

Outsource security processes:

Leave the complex processes to your MSP security specialist, so you can relax and concentrate on your core tasks!

Transparency:

Benefit from a short minimum contract term and notice period - daily to the end of the month. Billing is transparent and comprehensible.
