

# PASSWORD SAFE

## Password Safe is GDPR-ready

With Password Safe, you can easily store and process your corporate secrets in a way that is compliant with data protection laws. Our features help you securely implement Article 32 of the GDPR guidelines in Password Safe.

### Article 32, GDPR

„Taking into account the state of the art, the costs of implementation and the nature, scope, context and purposes of processing as well as the risk of varying likelihood and severity for the rights and freedoms of natural persons, the controller and the processor shall implement appropriate technical and organisational measures to ensure a level of security appropriate to the risk (...).“

### Our features for GDPR-readiness

#### Rights system:

Password Safe offers a role-based rights assignment that can be customized.

#### Minimal principle:

We do not collect any personal data. All you need to register and use Password Safe is an e-mail address.

#### Recovery:

Password Safe uses the MS SQL back-up system. In addition, data can be restored via the emergency WebViewer.

#### Protective functions:

Special protective functions such as password masking, multi-eye principle or temporary authorizations secure particularly sensitive stored data.

#### Encryption:

Password Safe uses the latest end-to-end encryption technologies and hashing functions.

#### Logging:

Password Safe logs data in a revision-proof manner. Data accesses are stored in the logbook and are thus protected from data manipulation.

#### Highest security:

We go through regular pentesting and provide updates several times a year to always meet the latest security requirements.
