Password Safe 8.13

MATESO
PASSWORD SAFE

Release Notes

Update 8.13

From 14.06.2021 Password Safe version 8.13 is available and can be downloaded in the update search of the software or from the **Customer Information System (KIS)**.

Improved performance

In version 8.13, the performance has been improved so that you can work with Password Safe and access your passwords even faster!

The advantages:

- less loading and waiting time
- fewer freezes
- faster login

What has been done?

- optimized SQL queries
- adding missing database indexes
- loading only necessary files
- reduced number of server calls
- prevented redundancies
- more asynchronous server calls on the client side

New Function: Trash

Until now, anyone who wanted to permanently delete a password on Password Safe had to think twice.

With the trash feature, deleting passwords is now easier: Deleted passwords are moved to the trash, the action is checked again and the password is restored.

The advantages:

- **Relief for IT:** if a deleted password needs to be restored, IT no longer needs to import a backup for this.
- **More usability through self-service solution:** You gain more control in Password Safe by being able to recover deleted passwords himself.

Target group:

The trash is now available in the desktop and web client and is suitable for all users.

At the request of our customers: With over 200 votes, this feature request achieved the highest ranking in our UserVoice.

# "My Devices and Connections"

Feature	Overview of devices and connections
Functionality	This feature is available in the desktop and web client for all users.
Benefit	**All logins at a glance:** You can see at a glance in your account which devices you are logged in with. **More security:** You can manually terminate connections to prevent third parties from gaining access to Password Safe.
Target group	Overview of all devices currently logged in with the user's account

Browser extension

Function: Improves status overviewt

You can now see at a glance whether you are still logged in to the browser extension.

Locked state

Unlocked state

Unlocked state + badge

Where can I download the browser extension?

Für Firefox   Für Chrome   Für MS Edge   Für Safari

- **Locked:** no active connection / not logged in
- **Not locked:** active connection / logged in
- **Zero display removed:** The badge will no longer be displayed if there are no credentials.

The Benefits:

- **More convenient to use:** The user automatically sees their login status without having to do anything.
- **Time saved:** The user no longer has to open the browser extension and manually click on „Reload data".
- **Better communication:** The browser extension can be used even more intuitively.

Further Desktop and WebClient improvements

Documents

Documents can now be associated with pass-
words and it is displayed which passwords are
associated with them.

Wizzards

The layout of the wizzards has been adjusted:
Added „Back" and „Next" buttons make navi-
gation through the individual steps easier and
more intuitive.

QR code scanner

The generation of QR codes for - for example
- connecting the mobile app to Password Safe
now takes place in Password Safe itself.
